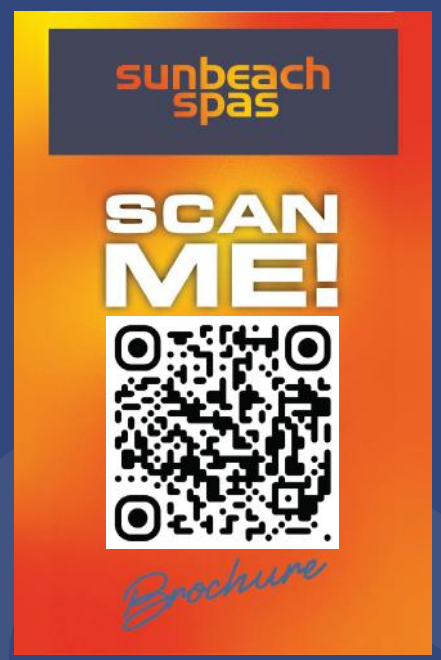
Download our brochure



In our efforts to stay as green as possible, this brochure is only available in paper format for your hot tub retailer. If you would like a copy, use the QR code above to download the brochure to your devices in digital format.

Warranty Information
Some warranties differ from showroom to showroom. Some dealers may offer extended warranties on top of our standard Sunbeach Spas warranty. All aspects of our hot tubs have varying warranties - for example the steel frame structure of our hot tubs are given 5 year warranties whereas the components such as the jets are given 3 year warranties. Please speak to your dealer for more information on warranty of your hot tub.

ABOUT US

Welcome to Sunbeach Spas

For over two decades, Sunbeach Spas has been dedicated to crafting exceptional hot tubs. Our globally certified (ETL, TUV, GS, CE, SAA, KC) products are a testament to our commitment to quality, durability and innovation. Each hot tub is meticulously designed to provide a truly luxurious and rejuvenating experience. With a strong reputation among dealers and customers, Sunbeach offers the pinnacle of relaxation and wellness.

Our commitment to excellence has been recognised by WhatSpa? who have awarded our SB344 hot tub Best Buy status for an impressive five consecutive years. We have also been awarded multiple other accolades making us a multiple award winner.

In this brochure you will find our new range of hot tubs as well as our HSG282 compliant range, which are perfect for holiday lets and holiday parks. All of our new range have a new modern look as well as new components such as lighting jets, waterfalls and base cabinets.

Discover the perfect way to unwind and recharge at home with Sunbeach Spa Hot Tubs, which are designed to offer a relaxing and rejuvenating experience whilst maintaining an element of entertainment with components such as bluetooth audio, LED Lighting, waterfalls and fountains.

UK POOL & SPA AWARDS

Energy Efficiency Awards for 6 Consecutive Years!

Knowing you're making a conscious choice for the environment. Our hot tubs, equipped with the latest energy-efficient insulation minimise en - ergy consumption and reduce your carbon footprint. This commitment to sustainability has earned us six consecutive UK Pool and Spa Awards for Energy Efficiency.

But it's not just about the planet. Our energy-efficient technology also translates to lower running costs for you. We've rigorously tested our hot tubs to ensure they deliver on their promise of reduced energy con- sumption.

Choose Sunbeach Spas for a luxurious, sustainable and affordable hot tub experience.

Award-winning R10 insulation

Setting new industry standards for energy efficiency and performance. Our proprietary R10 hot tub insulation has been recognised by industry experts WhatSpa and the UK Pool & Spa Awards for its outstanding performance, earning multiple awards for its innovative design, energy efficiency and sustainability. Fully TUV certified and approved.

R10 insulation is a measure of thermal resistance. The higher the R-value, the better the material is at insulating. In the context of hot tubs, R10 insulation is a significant upgrade that helps maintain water temperature, reducing energy consumption and costs.

R10 high-density insulation is typically applied to the hot tub's cabinet and cover. This helps to minimize heat loss. By reducing heat loss, R10 insulation helps lower energy consumption, leading to significant savings on heating costs. By reducing energy usage, R10 insulation contributes to a smaller carbon footprint.

R10 vs R10 PLUS insulation

R10+ insulation is a premium insulation system that builds on the already impressive R10 insulation standard. It offers even greater thermal efficiency, further reducing heat loss and energy consumption. This advanced insulation technology typically involves additional layers of high-quality insulation materials and specialised techniques to create a more robust barrier against heat transfer.

This includes additional insulation sheeting inside the hot tub that further prevents heat loss and in return helps to reduce both costs and the carbon footprint even further.

By choosing a hot tub with R10 or R10 PLUS insulation, you're investing in a product that not only enhances your outdoor living experience but also contributes to a more sustainable future.

Choosing your hot tub - made easy!

We have made choosing your hot tub so much easier with our new model numbers, so if you know what type of hot tub you are looking for, you can work out which of our tubs would suit you best.

***Please note our original series models have retained their model numbers as these tubs have been well known for a while - so if it isn't broke we aren't going to fix it.**

Our original series and series 5 are 13 Amp plug and play. Series 7 and 9 are 32 Amp models as they come with a little more oomph so need a little more power!

How to choose your hot tub:

The first number denotes which series the model comes from - 5 is series 5, 7 is series 7 and 9 is series 9.

The middle number(s) relate to how many seats the hot tub has. For example 5 would be a 5 person hot tub, 4 is a four person hot tub and 12 is a 12 person hot tub.

The last number of the model tells you what the seat style is:

0 = All seats
1 = Single lounger
2 = Double lounger
3 = Captain seat

Here are examples of our models:

552-DL: Series 5, 5 person hot tub with 2 loungers.

751-S: Series 7, 5 person hot tub with 1 lounger.

9120-S: Series 9, 12 person hot tub with all seats, no loungers.

Free Insulated Cover

All of our hot tubs come with a free insulated cover that compliments the colour of your hot tub.

Please note, all images within this brochure are for illustration purposes only and to give an understanding of the seating arrangement and jet/valve arrangement. Each hot tub may undergo minor changes after publication of this brochure.

552-DL: Series 5, 5 person hot tub with 2 loungers

942-DL: Series 9, 4 person hot tub with 2 loungers

522-DL: Series 5, 2 person hot tub with 2 loungers

CHROMATHERAPY

RED
Energy and Vitality:

Red is often associated with passion, energy and vitality.

ORANGE
Creativity and Joy:

Orange is linked to creativity, enthusiasm and joy.

YELLOW
Mental Clarity and Optimism:

Yellow is associated with mental clarity, optimism and intellect.

GREEN
Balance and Harmony:

Green is often associated with balance, harmony, and growth.

BLUE
Calm and Peace:

Blue is linked to calmness, peace and tranquility.

PURPLE
Intuition and Spirituality:

Indigo is associated with intuition, spirituality and wisdom.

Chromatherapy, often referred to as colour therapy or colour healing, is a complementary therapy that utilises coloured light to positively influence physical, emotional, and mental well-being. This practice is underpinned by the belief that different colours possess unique vibrational frequencies capable of interacting with the body's energy centres or chakras.

By carefully selecting and applying specific colours, practitioners aim to balance and harmonise these energy centres, promoting overall health and vitality. This ancient technique, with roots in various cultures, has experienced a resurgence in popularity in recent years, as people seek natural and holistic approaches to wellness.

Chromatherapy treatments typically involve exposure to coloured light through various methods, including coloured lamps, filtered light, or coloured cloths. Practitioners may also incorporate colour into meditation or visualisation techniques to enhance their therapeutic effects.

All ranges of our hot tubs have an element of chromatherapy to give you the most enjoyable and relaxing experience you could imagine.

RGB LIGHTING

Original Series

The Original Series is Sunbeach Spas 13 Amp plug and play range which is well-known across the UK. Some models in this range are both award winning and HSG282 compliant which makes them perfect for the holiday rental sector. These hot tubs remain unchanged from the original designs that have made them the award-winning tubs that they are.

Side Panels

The side panels of this range are made of durable weather-resistant materials. These panels are designed to be both aesthetically pleasing and functional, contributing to the overall look and performance of the hot tub. The panels include insulation to help maintain water temperature and reduce energy consumption. The panels are also designed to make access to the internal components easier to aid in repair and maintenance.

Chromatherapy Lighting

All of this series have water level colour changing LED lighting to enhance the enjoyment of your hot tub. Complimentary to this, each hot tub in this series also has a large underwater colour changing LED light to further enhance the experience and enjoyment of this range. Each colour has it's own effect on mood and energy.

Power

The original series has a 'plug and play' 13 Amp as this is all that is needed to power these tubs, making them easy to use and convenient as no extra electrical installation is needed.

Pumps

Our strive to make this range as useful as possible means that we can get an amazing amount of power through our jets using a single pump. Depending on the model, you will get a 2 horse-power pump, along with a 0.35 horse-power circulation pump.

Jets

As expected, we have kept the same jets that have made this series the reliable hot tubs that many people have already experienced. The jets, with chrome detailing, are designed to perform differently depending on the type of jet. The types included in this series are fixed, adjustable and rotary.

Features

With a focus towards being HSG282 compliant, this majority of this series has been designed to have no removable components. This is to reduce and control the spread of legionella and other infectious agents in hot tub systems. This is particularly important for hot tubs in holiday let and holiday park settings where different groups will be using the facilities in a short space of time.

Specification

- Dimensions: 1830 x 1230 x 700 mm

Series 5

13 Amp

New Side Panels

The new Sunbeach Spas Series 5 hot tubs have been given a fresh, new, modern look with 2 section grey panels and double corner lights, making your hot tub experience the most enjoyable ever. The corner lights help you to see around your tub during the darker nights but also provide some entertainment as they are LED RGB colour changing lights which react the same as the interior LED lights and provide an element of chromatherapy.

TP500S

The Balboa TP500S is a topside control panel designed for use with Balboa's BP series of hot tub control systems. It features a sleek design with an LCD display that shows moving function indicator icons and maintenance reminders.

Key features of the TP500S include:

- Compatibility: Works with Balboa BP series control systems.
- Display: LCD display with moving icons and maintenance reminders.
- Controls: Buttons for WARM, COOL, MENU, LIGHT, JETS, and AUX functions.
- Connectivity: 4-pin connector for connection to the control system.
- Dimensions: Length: 181 mm (7.1 inches)

The TP500S is a popular choice due to its ease of use, clear display and compatibility with a wide range of Balboa control systems.

Hydrosound Audio

With our series 5 range of hot tubs, your hot tub experience is enhanced with Hydrosound. The state-of-the-art transducer speakers transform your hot tub into a symphony of sound, delivering crystal-clear audio that resonates through the water.

Unlike traditional speakers, Hydrosound transducers seamlessly integrate underneath your hot tub shell, creating a truly unique and captivating listening experience. Feel the music as it pulsates through the water, surrounding you in a rich, full-bodied soundstage.

These speakers offer a full-range sound experience. You can hear the bass, mids and highs, all while enjoying the unique sensation of feeling the music through the water.

The transducer speakers cause the shell of the hot tub to vibrate, turning it into one giant speaker cone.

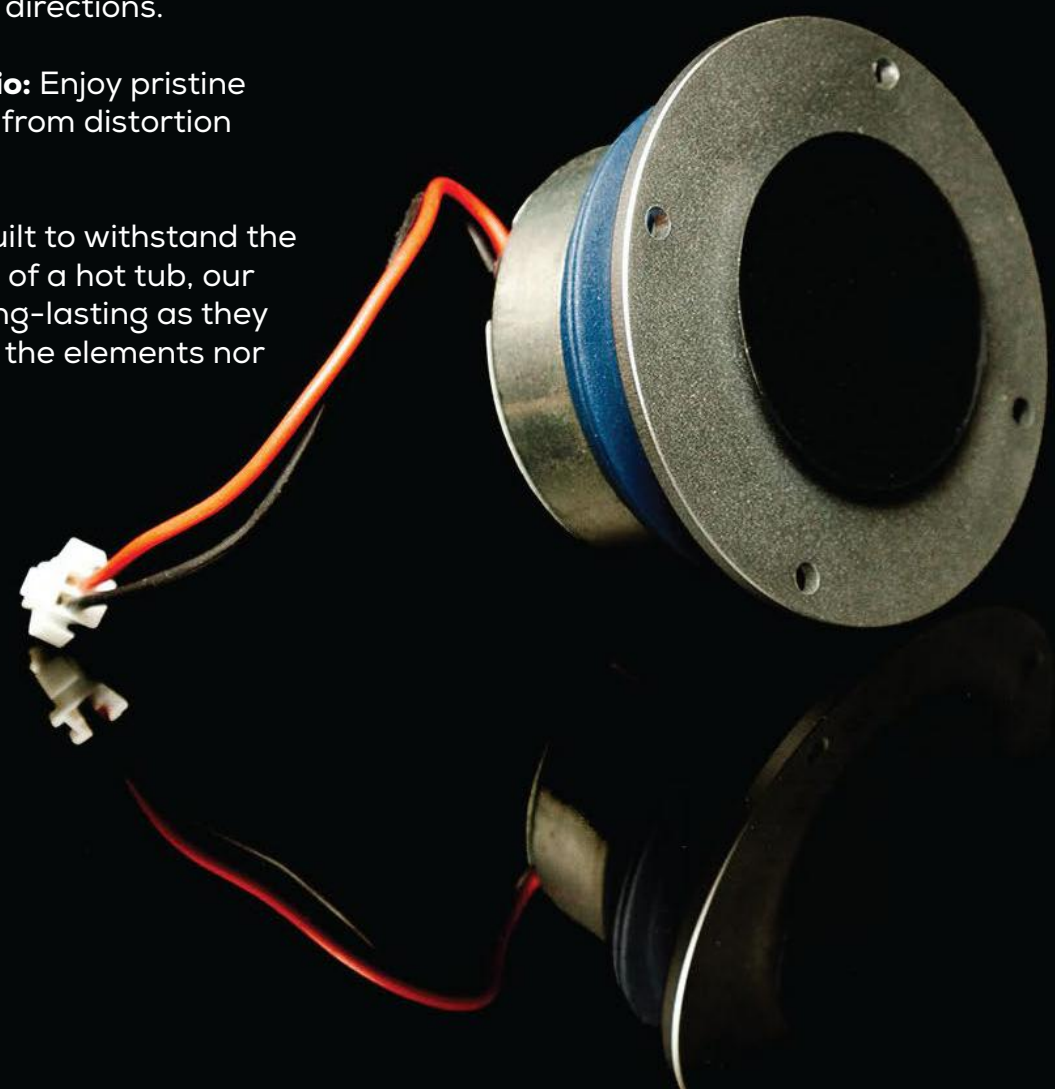
Key Features:

Invisible Speakers: With transducer speakers mounted directly to the shell of the hot tub, inside the cabinet, the speakers the sound appears to come from nowhere.

Immersive Sound: Experience music like never before, with sound that envelops you from all directions.

Crystal-Clear Audio: Enjoy pristine sound quality, free from distortion and interference.

Durable Design: Built to withstand the harsh environment of a hot tub, our transducers are long-lasting as they are not exposed to the elements nor the hot tub water.



Redesigned modern hydrotherapy jets

Sunbeach Spas meticulously selects hot tub jets, each with a distinct purpose to enhance your hydrotherapy experience. Powerful massage jets knead away tension and soothe aching muscles, targeting specific areas like the shoulders, back and legs. These jets offer a vigorous massage, perfect for athletes or those seeking relief from physical exertion. In contrast, gentler pulsating jets lull the body into a state of deep relaxation, reducing stress and promoting mental clarity. These jets are ideal for a tranquil soak, allowing you to unwind and de-stress after a long day.

Our thoughtfully designed jet system offers a personalized and rejuvenating experience, catering to diverse preferences. Whether you crave a vigorous massage or a tranquil soak, Sunbeach Spas has the perfect jet configuration to meet your needs.

The jets we have specifically chosen for Series 5 are grey in colour and each have specific functions and come in different sizes.

SINGLE ROTARY JET

TWIN ROTARY JET

ADJUSTABLE DIRECTIONAL JET

These jets allow you to precisely control the direction and intensity of the water flow, targeting specific muscle groups for a more focused massage. By adjusting the angle of the jet, you can direct the water stream to areas like your neck, shoulders, back, or legs.
Sizes: 2", 3", 4", 5"

NON-ADJUSTABLE FIXED POINT JET

Non-adjustable jets in a hot tub provide a consistent water flow and massage experience. They are typically positioned to target specific areas of the body, such as the back, shoulders, or legs. They offer a reliable and effective way to relax and relieve muscle tension.
Sizes: 50mm

ADJUSTABLE DIRECTIONAL JET

SINGLE ROTARY JET

Single rotary jets in a hot tub provide a soothing, circular massage. As the jet rotates, it delivers a rhythmic stream of water that can help to relieve muscle tension and promote relaxation.

These jets are often positioned to target specific areas of the body. The rotating motion of the jet can help to loosen tight muscles and improve circulation.
Sizes: 2", 3", 4", 5"

TWIN ROTARY JET

Twin rotary jets in a hot tub provide a more intense and targeted massage experience than single rotary jets. By combining the power of two rotating jets, they can deliver a deeper, more penetrating massage to specific areas of the body.
Sizes: 2", 3", 4", 5"

FIXED POINT JET

Series 7

Side Panels

The side panels of this range are made of durable weather-resistant materials. These panels are designed to be both aesthetically pleasing and functional, contributing to the overall look and performance of the hot tub. The panels include insulation to help maintain water temperature and reduce energy consumption. The panels are also designed to make access to the internal components easier to aid in repair and maintenance.

Chromatherapy Lighting

All of this series have water level colour changing LED lighting to enhance the enjoyment of your hot tub. Complimentary to this, each hot tub in this series also has a large underwater colour changing LED light to further enhance the experience and enjoyment of this range. Each colour has it's own effect on mood and energy.

Power

Series 7 hot tubs require a 32 Amp power supply as they need a little more power to operate more features such as more powerful pumps (and more of them!).

Pumps

Making the most of the power available, Series 7 has 2x 3 horsepower pumps delivering the maximum pressure available to give you the ultimate experience with this range of hot tubs. We have also included a 0.35hp circulation pump.

Jets

Similar to the original series, we have kept our original range of jets that have been reliable, efficient and enhanced the experience of our hot tubs. The jets, with chrome detailing, are designed to perform differently depending on the type of jet. The types included in this series are fixed, adjustable and rotary.

Features

This range has multiple features that are notable. Firstly, this range has two different water features - a flat, blade style waterfall which is adjustable with the control valves and finally we have roman style water fountains that can further enhance your hot tub experience. We have also included RGB water level LED lights and a large under-water LED light to aid with chromatherapy.

Control Panel

Balboa TP600: features a large, easy-to-read LCD screen that displays temperature, time, and other important information. The TP600 has clearly labeled buttons for controlling various spa functions, such as jets, lights, and temperature. Balboa TP600 panels have intuitive menu systems that let you configure various settings like filter cycles, heating modes, and temperature units. It also displays diagnostic error messages to help troubleshoot potential problems with the spa system which are crucial for identifying issues.

Series 9

New Side Panels

The new Sunbeach Spas Series 9 hot tubs have been given a fresh, new, modern look with 2 section grey panels and double corner lights, making your hot tub experience the most enjoyable ever. The corner lights help you to see around your tub during the darker nights but also provide some entertainment as they are LED RGB colour changing lights which react the same as the interior LED lights and provide an element of chromatherapy.

Hydrosound Audio

With our series 9 range of hot tubs, your hot tub experience is enhanced with Hydrosound. The state-of-the-art transducer speakers transform your hot tub into a symphony of sound, delivering crystal-clear audio that resonates through the water.

Unlike traditional speakers, Hydrosound transducers seamlessly integrate underneath your hot tub shell, creating a truly unique and captivating listening experience. Feel the music as it pulsates through the water, surrounding you in a rich, full-bodied soundstage.

These speakers offer a full-range sound experience. You can hear the bass, mids and highs, all while enjoying the unique sensation of feeling the music through the water.

The transducer speakers cause the shell of the hot tub to vibrate, turning it into one giant speaker cone.

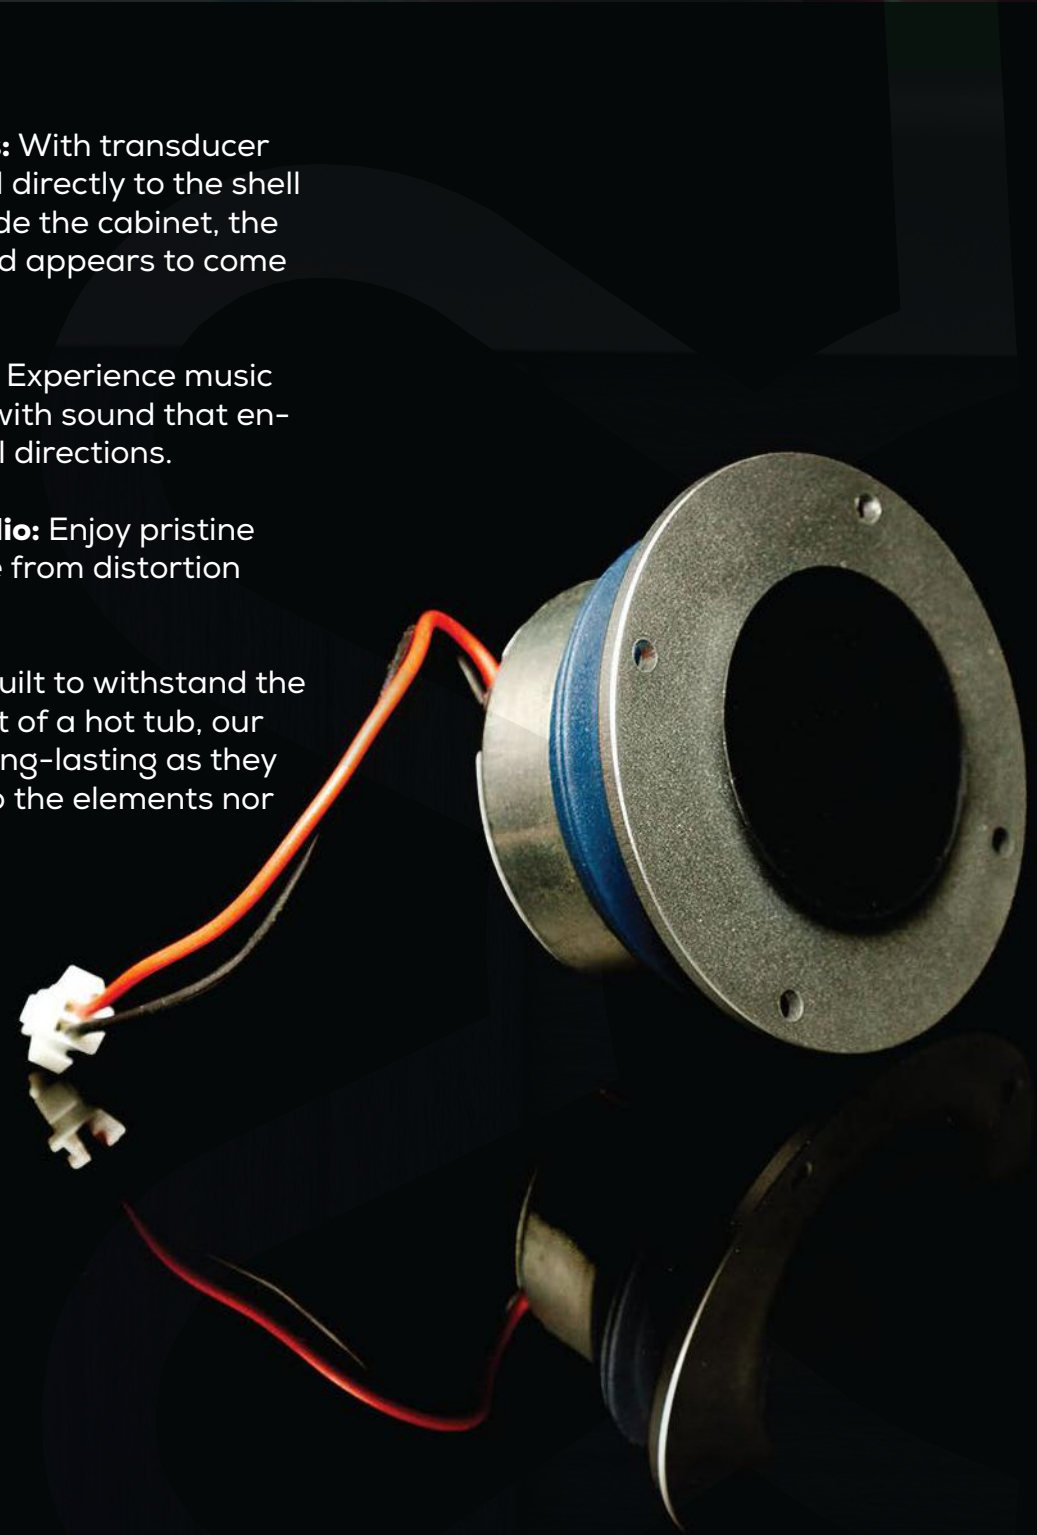
Key Features:

Invisible Speakers: With transducer speakers mounted directly to the shell of the hot tub, inside the cabinet, the speakers the sound appears to come from nowhere.

Immersive Sound: Experience music like never before, with sound that envelops you from all directions.

Crystal-Clear Audio: Enjoy pristine sound quality, free from distortion and interference.

Durable Design: Built to withstand the harsh environment of a hot tub, our transducers are long-lasting as they are not exposed to the elements nor the hot tub water.



Redesigned modern hydrotherapy jets

Sunbeach Spas meticulously selects hot tub jets, each with a distinct purpose to enhance your hydrotherapy experience. Powerful massage jets knead away tension and soothe aching muscles, targeting specific areas like the shoulders, back and legs. These jets offer a vigorous massage, perfect for athletes or those seeking relief from physical exertion. In contrast, gentler pulsating jets lull the body into a state of deep relaxation, reducing stress and promoting mental clarity. These jets are ideal for a tranquil soak, allowing you to unwind and de-stress after a long day.

Our thoughtfully designed jet system offers a personalized and rejuvenating experience, catering to diverse preferences. Whether you crave a vigorous massage or a tranquil soak, Sunbeach Spas has the perfect jet configuration to meet your needs.

The jets we have specifically chosen for this range each have specific functions and come in different sizes.

SINGLE ROTARY JET

TWIN ROTARY JET

ADJUSTABLE DIRECTIONAL JET

These jets allow you to precisely control the direction and intensity of the water flow, targeting specific muscle groups for a more focused massage. By adjusting the angle of the jet, you can direct the water stream to areas like your neck, shoulders, back, or legs.
Sizes: 2", 3", 4", 5"

NON-ADJUSTABLE FIXED POINT JET

Non-adjustable jets in a hot tub provide a consistent water flow and massage experience. They are typically positioned to target specific areas of the body, such as the back, shoulders, or legs. They offer a reliable and effective way to relax and relieve muscle tension.
Sizes: 50mm

ADJUSTABLE DIRECTIONAL JET

SINGLE ROTARY JET

Single rotary jets in a hot tub provide a soothing, circular massage. As the jet rotates, it delivers a rhythmic stream of water that can help to relieve muscle tension and promote relaxation.

These jets are often positioned to target specific areas of the body. The rotating motion of the jet can help to loosen tight muscles and improve circulation.
Sizes: 2", 3", 4", 5"

TWIN ROTARY JET

Twin rotary jets in a hot tub provide a more intense and targeted massage experience than single rotary jets. By combining the power of two rotating jets, they can deliver a deeper, more penetrating massage to specific areas of the body.
Sizes: 2", 3", 4", 5"

FIXED POINT JET

INTERFACE

Spa Touch™ 4

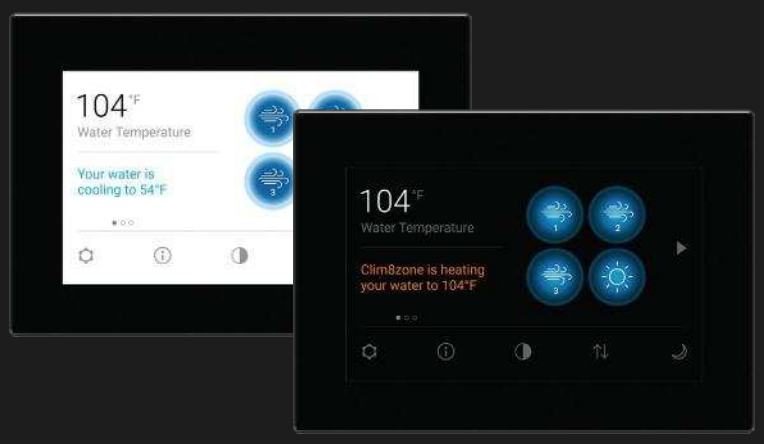
touch interface

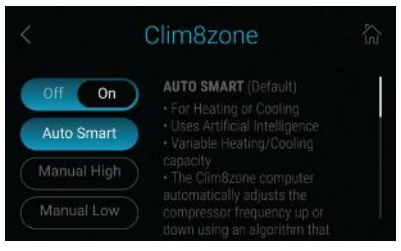
CONTROL PANELS

With our new touchscreen user interface, everything you love is easier than ever! The streamlined design puts the features you need right at your fingertips. The modern and clean visuals complement any hot tub design.

Spa Touch™ 4 has Wi-Fi integrated directly, making the spa available remotely via a mobile device from inside your home or across the country. Adding wireless support enables over-the-air updates, so you can continually utilise new software enhancements anywhere in the world.

Enjoy a crystal clear user experience in any lighting condition with light and dark mode.





The Balboa Spa Touch 4 is a topside control panel for hot tubs and spas, known for its advanced features and user-friendly design.

It boasts a stunning graphical interface powered by an Arm® dual-core 800MHz processor, delivering superior functionality and performance.

Stunning Graphical Interface: A visually appealing and intuitive touchscreen display for effortless control.
Integrated Wi-Fi Connectivity: Remotely access and control your spa from anywhere using your mobile device. This makes it possible for your hot tub engineer to access and diagnose your hot tub issues remotely.
Advanced Functionality: Seamless management of spa settings, including temperature, filtration, lighting and more.
Energy Efficiency: Optimise energy consumption with smart features and scheduling options.

The Balboa Spa Touch 4 offers a premium hot tub experience, combining cutting-edge technology with ease of use.
